## Online Training Opportunities

Child Care Aware® of Kansas Online Learning courses are designed for busy early childhood professionals. These courses meet annual KDHE training requirements for Licensure as well as training requirements for the Child Development Associate (CDA) credential. Find courses that provide information and ideas for activities with children, such as:

**Stress in Young Children**

All children experience stress at some time when growing up. You can help children deal with stress by providing a supportive, stable, predictable and developmentally appropriate environment. Learn the types and sources of stress and stress-related symptoms and behaviors in young children and strategies to instill optimism and reduce stress.

**Helping Children Cope with Grief**

Early care and education programs can function as an important support for children that have experienced a loss or disaster. Learn the phases of grief and children's reactions to grief or stress and discover how to help children develop healthy coping skills. This course also discusses children's behaviors that may indicate a difficulty coping with grief, and guidelines for child care providers to use when communicating concerns to parents.
